

Last week Comcast corporation which controls cable in 70% of the top 20 media outlets censored an anti-war commercial paid to run during the state of the union address. Clearly this shows the problem of censorship which can develop when too few media companies control too many American's access to information. Our democracy depends on a proliferation of speech, not its limitation! Please limit the number of tv and radio outlets which can be controlled by a single corporation! The health of our democracy literally depends on it!
